

## MailPlus License

The MailPlus and MailPlus Server packages allow your business to set up a secure, reliable, and private mail server, while giving your employees a modern mail client to receive and send messages. Furthermore, MailPlus and MailPlus Server are packages that can be installed on your Synology NAS, so there's no need to rely on third-party services. Best of all, MailPlus comes with 5 free accounts and flexible licensing plan to fit your needs.

### Highlights

- A secure, private, and cost effective email solution
- Active-active architecture maximizes the service uptime
- Specially designed algorithm for high speed full-text search
- Beautifully designed and intuitive mail client allows efficient email management
- Cross-platform support on web client and dedicated mobile apps on Android™/iOS
- Flexible licensing plan suitable for small and medium business

### Licensing Plan

Synology MailPlus comes with **5 free email accounts** and allows you to add more accounts by purchasing additional licenses according to business needs. There are two versions of license packs available: **5** or **20** units of email accounts, both with **1-year validity**, so you can use the mail service and migrate the licenses freely within one year upon license activation. In addition, **email aliases are not considered to be email accounts**, so no extra licenses are required.

### Active-active Architecture

No additional fee will be charged for active-active high availability. One cluster includes **5 free mail accounts by default**, and additional licenses are required for the total number of enabled accounts from LDAP server or Windows AD domain. For example, if you want to enable 25 email accounts in the active-active cluster, then 20 additional licenses are needed.

### MailPlus Web Client and Mobile App

MailPlus web client and mobile app will be updated regularly and can be used for free in conjunction with MailPlus Server. However, their functions will be affected or limited if there are insufficient valid licenses in MailPlus Server. In addition, MailPlus web client and mobile app require MailPlus Server to run.

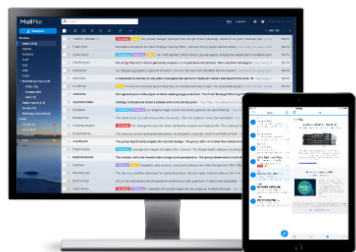

### Activation and Extension

You can register and unbind the license keys on **MailPlus Server** package > **License** page, or manage them at **account.synology.com**. By applying completely new license keys of the same type (5-account or 20-account version) in advance, you can **extend the validity of the registered license keys** based on business needs. One license key can be applied to only one MailPlus supported Synology product at a time.

## MailPlus Server

The MailPlus Server package transforms your Synology NAS into a powerful, resilient mail server with high-availability design, load balancing, spam filters, malware protection, ensuring your company's communications are smooth, well-protected, and available at all times.

## Web Client/Mobile App

MailPlus provides cross-platform support on your web browser and mobile devices. Organize with labels, sort using filters, and search emails in a breeze.

## License Expiration Notification

MailPlus Server will begin to send the first notification to the administrator **two months** before the license expiration date. After the first notification, the system will continuously notify you at the following frequency:

- when the license key has only one-month validity remaining
- when the license key has only two-week validity remaining
- daily during the last week of validity
- immediately after the license key expires

## License Expiration

When the number of active email accounts outnumber the valid licenses in MailPlus Server, some functions like **Security, Full-text Search** and **SMTP** will be limited or suspended. However, all the users can still send and receive emails. To fix this, you can add more valid licenses to MailPlus Server, or disable the active email accounts, so the valid licenses are equal to or outnumber the enabled email accounts.

## Purchase Information

If you would like to place orders for MailPlus license packs, please refer to the product names below:

Product Name	Product Information
MailPlus 5 Licenses	MailPlus license pack for 5 email accounts
MailPlus 20 Licenses	MailPlus license pack for 20 email accounts
